Atividade 07 de Integração e Entrega Contínua

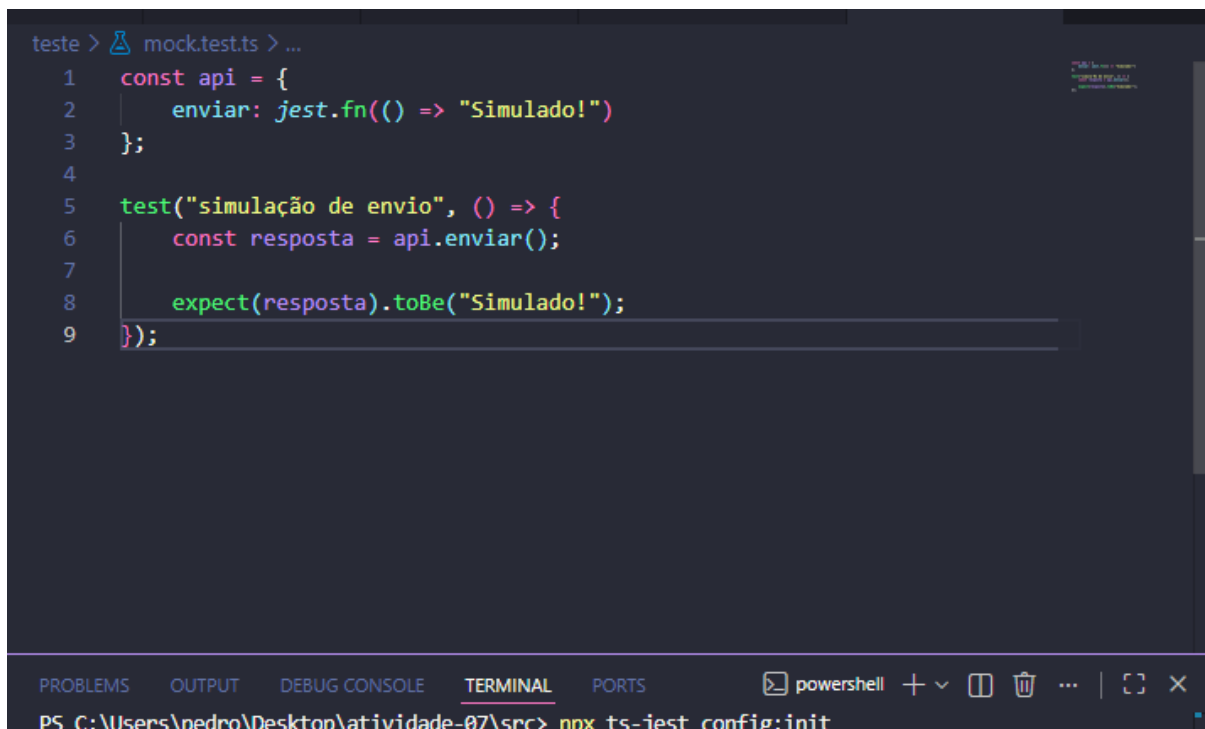

Tema – Introdução a Testes Automatizados Avançados

Exercício 01:

```
teste > alerta.test.ts | jest.config.js | integracao.test.ts | processamento.test.ts X ▶ □ ...
1 import { processarAlerta } from "../src/notificacao";
2
3 test("processamento completo de alerta crítico", () => {
4     const resultado = processarAlerta(90);
5
6     expect(resultado).toBe("Notificação enviada: Crítico");
7 });
```

Exercício 02:

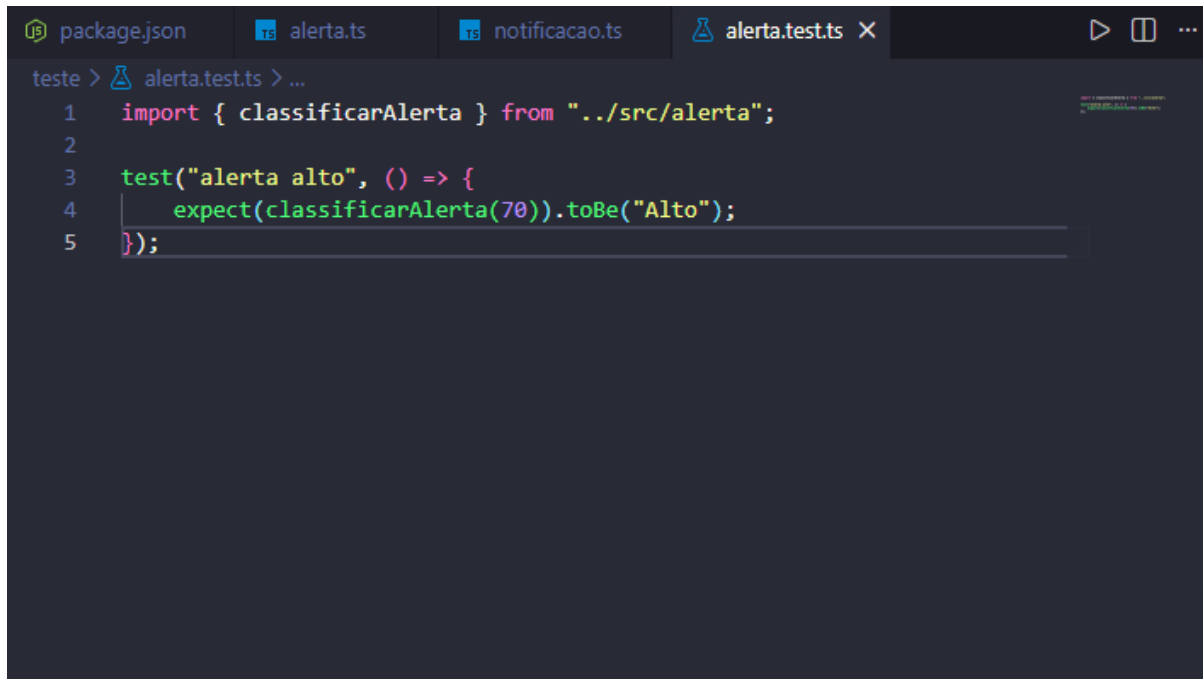

```
teste > mock.test.ts > ...
1 const api = {
2     enviar: jest.fn(() => "Simulado!")
3 };
4
5 test("simulação de envio", () => {
6     const resposta = api.enviar();
7
8     expect(resposta).toBe("Simulado!");
9 });
```

PS C:\Users\pedro\Desktop\atividade-07\src> npx ts-jest config:init

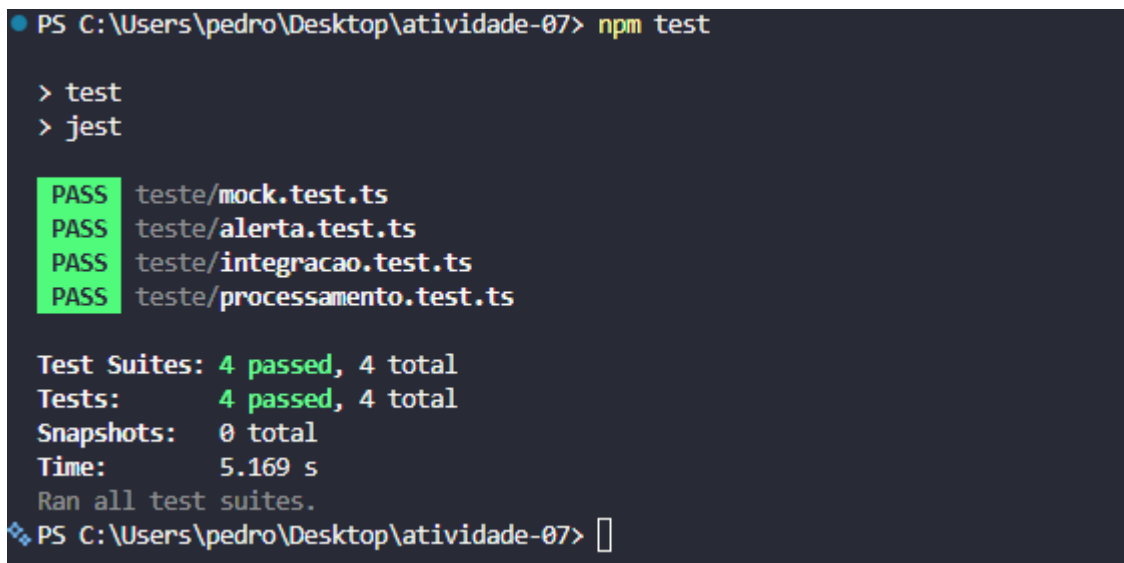

Exercício 06:

The screenshot shows a VS Code editor with four tabs: package.json, alerta.ts, notificacao.ts, and alerta.test.ts. The alerta.test.ts tab is active, showing the following code:

```
teste > alerta.test.ts > ...
1  import { classificarAlerta } from "../src/alerta";
2
3  test("alerta alto", () => {
4      expect(classificarAlerta(70)).toBe("Alto");
5  });
```

Testes:

The screenshot shows a PowerShell terminal with the following commands and output:

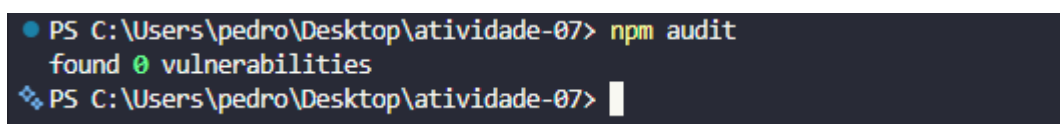

```
PS C:\Users\pedro\Desktop\atividade-07> npm test

> test
> jest

PASS teste/mock.test.ts
PASS teste/alerta.test.ts
PASS teste/integracao.test.ts
PASS teste/processamento.test.ts

Exercício 03:

The screenshot shows a PowerShell terminal with the following commands and output:

```
PS C:\Users\pedro\Desktop\atividade-07> npm audit
found 0 vulnerabilities
❖ PS C:\Users\pedro\Desktop\atividade-07>

Exercicio04:

The image shows two screenshots from the GitHub Actions interface. The top screenshot displays the workflow file `security.yml` in the `.github/workflows` directory. The workflow is named "Security Audit" and is triggered on pushes to the `main` branch or pull requests to `main` or `dev`. It includes a job named `audit` that runs on `ubuntu-latest` using `actions/checkout@v4` and `actions/setup-node@v4` (with `node-version: 20`). The job steps are: Checkout, Setup Node, Install dependencies (using `npm install`), Security Audit (using `npm audit`), Post Setup Node, Post Checkout, and Complete job.

The bottom screenshot shows the execution results for the "Security Audit" workflow. The workflow failed with 1 error and 1 warning. The error is related to the `audit` job, which failed 3 minutes ago. The workflow steps are listed with their status and duration:

Step	Status	Duration
Set up job	Success	1s
Checkout	Success	1s
Setup Node	Success	3s
Install dependencies	Failure	1s
Security Audit	Warning	0s
Post Setup Node	Warning	0s
Post Checkout	Success	0s
Complete job	Success	1s

Erro por pois o `eslint-plugin-react` ainda não aceita ESLint 10.

Foi criado o workflow `security.yml` na pasta `.github/workflows`. Após o push para a branch `feature/seguranca`, o GitHub Actions executou automaticamente a auditoria de segurança. A execução identificou um conflito de dependências relacionado ao ESLint existente no repositório, comprovando o funcionamento do pipeline.
